

EnergyCONNECT™ vs Qbyte: Which Solution Fits Your Needs?

It's more important than ever for oil and gas companies to leverage a scalable, secure, and modern technology solution.

MCA Connect's EnergyCONNECT™ is seamlessly integrated with Microsoft Dynamics 365. It provides a comprehensive, future-ready platform specifically designed to address the unique challenges and requirements of the oil and gas industry.

Why Transition from Qbyte to EnergyCONNECT™?

Enhance Security and Mitigate Risk

Data breaches or compliance failures can have significant impacts on oil and gas companies. Qbyte's legacy platform has known vulnerabilities, while EnergyCONNECT™ is natively built-in to Microsoft Dynamic 365 and provides enterprise-grade security. EnergyCONNECT™ provides advanced compliance tools, data encryption, and seamless updates to stay ahead of potential threats.

Microsoft

Lay a Future-Ready Foundation

Qbyte users often cite concerns over stagnation. Once a thriving solution, Qbyte's lack of product enhancement, modernization, and support following acquisitions has left many companies drifting. In contrast, EnergyCONNECT™ delivers continuous innovation through Microsoft's unparalleled investment in AI, machine learning, and automation tools. With a steadfast commitment to modernization, the platform is designed to evolve with your business.

Connect with Your Community

Microsoft boasts one of the largest user groups globally, offering a robust ecosystem of peers and experts for shared learning and collaboration. MCA Connect also offers a community of EnergyCONNECT™ users, ensuring you have similar connections and resources at your fingertips.

Become Scalable and Flexible

EnergyCONNECT™ leverages the world's #1 low-code platform to empower businesses with intelligent automation, advanced reporting, and tailored workflows—all natively integrated within Dynamics 365. Whether you're scaling operations, automating processes, or mining valuable insights, the flexibility ensures your ERP system grows with you.

Experience Efficiency and Cost Savings

EnergyCONNECT™ simplifies joint venture accounting by managing divisions of interest and tracking financials for each owner. Automation streamlines traditionally manual processes, enabling staff to focus on higher-value tasks. For example, leading oil and gas producers reduce their month-end processing time from five days to mere hours with EnergyCONNECT™. Additionally, customers report a 30% reduction in ERP costs post-implementation.

Customer Success

Leading Oil Producers Modernize and Optimize

Several leading oil producers chose to modernize from Qbyte to EnergyCONNECT™ with Dynamics 365. They reduced costs, improved efficiency, and enhanced security. Want to hear straight from the source? Ask us for references!
